

Original Bavarian base and speciality malts since 1856

## IREKS Crystal Ebony

<b>Colour:</b>	380 - 420 EBC
<b>Lovibond:</b>	140 - 160
<b>Type of beer:</b>	dark beers, Bockbiere, Stout Porter, Schwarzbiere
<b>% of the grist:</b>	≤ 10

### Description/Application:

This especially dark IREKS crystal malt can also be used in low quantities in the grist for light beers to vary the colour without influencing the taste significantly. Over and above, the level of colour, the full-bodied taste and the foam stability of dark beers can be intensified.

### Production:

Saccharified, caramelized and roasted in the roasting drum.

### Standard specification:

			Method*
Extract, dry matter	> 73	%	R-260.02.080 [2016-03]
Moisture Content	< 5	%	R-200.18.020 [2016-03]
Wort Colour	380 - 420	EBC	R-261.01.110 [2016-03] R-205.07.110 [2016-03]
Protein Content, dry matter	< 13.5	%	R-200.20.030 [2016-03]
pH-value	5.0 - 5.8		R-205.06.040 [2016-03]

\*Analysis method according to MEBAK, Raw Materials, 2016

Brewing grain is a natural product and is subject to qualitative fluctuations which can have an effect on the specification values listed.
